

Jackie24.com

Automated Web Software Engineering

**Build and deploy
a complete web application
with a single email**

Microsoft
GOLD CERTIFIED
Partner

POWERED
BY **IT24**

Product Description

Jackie24.com automates repetitive web business software development tasks by combining:

many years of software development experience
an extension of the relational database model
a proven software base with top standards
a common set of services and controls
a strong design pattern (Model-View-Controller)
an automated data model generation engine
an automated code generation mechanism
an application builder script language
a flexible, complete, easy-to-use framework design

Jackie24.com, IT24 Framework, is Microsoft .Net based and focused in the .Net (C#) & SQL Server environment.

Product Benefits

- **Reduces time and cost of development**
- **Generates fully functional, quality web software**
- **Reduces IT resource need and dependency**
- **Optimizes component and data reusability**
- **Rapid ROI**
- Lets you focus on domain knowledge & business logic
- Easy to customize (if needed)
- Provides real-time prototyping and change management
- Facilitates team development environment sharing
- Maintains better software standards and SOX compliance

What sets Jackie24 apart?

- Speed and simplicity: **one email = one application**
- Fully exploits data relationships to build apps
- Self-Learning
- 100% Web-based
- Real-time, concurrent dev team collaboration
- **Application Building Script Language**

How to get it...

- **Review an application created by Jackie24**
- **Sign-up for a free 30-day trial**
- **Build a couple sample applications with Jackie24**
- **Evaluate Jackie24 results and ROI**
- **Sign agreement**
